Julian M. Goldman, MD is the Medical Director of Biomedical Engineering for Mass General Brigham, an attending anesthesiologist at the Massachusetts General Hospital, and Director of the Medical Device Interoperability & Cybersecurity (MD PnP) program which he founded in 2004. The MD PnP program performs research, development, and testing of interoperable medical device systems in conjunction with clinicians, engineers, manufacturers, and regulators.

Dr. Goldman is Board Certified in Anesthesiology and Clinical Informatics. He completed anesthesiology residency and research fellowship in medical device informatics at the University of Colorado. He departed Colorado as a tenured associate professor to work as chief medical officer of a medical device company and subsequently joined Harvard Medical School and the Department of Anesthesia, Critical Care, and Pain Medicine at MGH.

Dr. Goldman served as a Visiting Scholar in the FDA Medical Device Fellowship Program, and served on FCC, NSF, CDC, VHA and FDA committees. His standards development work includes chairing ISO Technical Committee 121 WG3 on cybersecurity and co-chair of the AAMI Interoperability Working Group. His awards include the International Council on Systems Engineering Pioneer Award, the American College of Clinical Engineering award for Professional Achievement in Technology, the AAMI Foundation/Institute for Technology in Health Care Clinical Application Award, and the University of Colorado Chancellor's "Bridge to the Future" award.
