

Denise Anderson, President and CEO, Health Information Sharing and Analysis Center (H-ISAC)

I have several decades of executive leadership experience in the private sector and 15 years in critical infrastructure security. I was an EMT(B), Firefighter, Adjunct Instructor and EMT Evaluator in Virginia. I lead the Health ISAC, (since 2015) which serves as the operational arm for physical and cyber security coordination and collaboration in the sector. Our mission is to enable and preserve the global public trust by advancing health sector cyber and physical resilience and the ability to prepare for and respond to cyber and physical threats and vulnerabilities. Prior to that I was employee number two at the Financial Services-ISAC (FS-ISAC). I am also Chair of the National Council of ISACs (NCI) (since 2009) so I interact on a daily basis with all of the other critical infrastructure ISACs and lead efforts for the NCI to foster the resilience of the various critical infrastructure sectors. I serve on the CIPAC Council along with the other Council Partnerships, including the Cross-Sector Council, and sit on the Board or serve as an advisor to a number of global organizations involved with critical infrastructure security. I consider myself to be an information sharing evangelist.
