

Chris Reed leads the corporate Product Security Office at Medtronic, providing governance, centralized product security services and coordination of systemic security risk management across Medtronic's product portfolio. Reports to Medtronic's Chief Quality Officer and is a member of the Medtronic Quality Leadership Team. Spent 2 years prior as Medtronic's Director of Regulatory Policy for Product Security and Digital Health working on key regulatory legislation and initiatives such as the PATCH act. Also advised Medtronic businesses through various cybersecurity related product issues both with submissions and with deployed products. Also spent over 21 years with Eli Lilly and Company including building Lilly's product security program supporting Digital Health including connected diabetes management products. Actively engaged as a leader in many medical device security and digital health industry initiatives such as the MDIC Cybersecurity Working Group, Health-ISAC Medical Device Security Information Sharing and Coordination's Advisory Committee and as co-lead for the Healthcare Sector Coordinating Council's MedTech Cybersecurity Task Group.
